

CampusPress for Higher Education

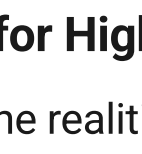

A fully managed WordPress multisite platform built to simplify governance, reduce risk, and give your team back time.

Higher education institutions face a common challenge: hundreds of decentralized websites, limited internal resources, increasing compliance pressure, and growing expectations from students and stakeholders.

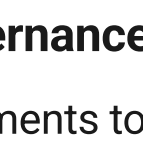

CampusPress is designed specifically to solve these challenges—providing a secure, scalable, and fully managed WordPress platform that enables institutional control without slowing down departments.

Why Institutions Choose CampusPress

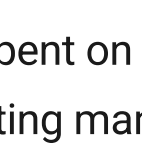

Built for Higher Ed

Designed around the realities of decentralized universities, not generic enterprise use cases.

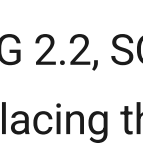

Centralized Governance, Local Autonomy

Empower departments to manage their own sites within a controlled, compliant framework.

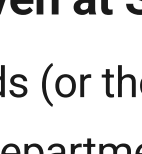

Reduced Internal Workload

Eliminate time spent on updates, security patching, hosting management, and troubleshooting.

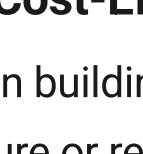

Compliance Without Complexity

Support for WCAG 2.2, SOC 2, HECVAT, and VPAT—without placing the burden on your internal teams.

Proven at Scale

Manage hundreds (or thousands) of sites across faculties, departments, and programs from a single platform.

Predictable, Cost-Effective Model

More efficient than building and maintaining internal infrastructure or relying on fragmented agency support.

Common Challenges We Solve

- ✓ Hundreds of inconsistent, independently managed websites
- ✓ Lack of control over accessibility and compliance
- ✓ Security risks from outdated plugins and unmanaged hosting
- ✓ Faculty and departments creating “shadow IT” websites
- ✓ Overstretched web and IT teams
- ✓ Difficulty scaling digital presence across campuses

CampusPress replaces fragmentation with a **governed, scalable, and fully supported platform.**

Platform Overview

Starter Network

For smaller institutions or those beginning to centralize their web ecosystem

A streamlined multisite platform that establishes governance, improves security, and reduces operational burden from day one.

What this means for your team:

- Launch and manage departmental sites quickly from a central dashboard
- Eliminate manual updates and maintenance tasks
- Ensure a secure, compliant foundation across all sites

Key Capabilities

- Managed WordPress multisite network
- Centralised dashboard for site creation and management
- Theme and plugin governance
- Fully managed hosting (staging + production)
- Performance optimisation and scaling
- Automated updates, backups, and disaster recovery
- Analytics & Reporting
- 99.9% SLA-backed uptime
- SOC 2 Type II infrastructure
- WCAG 2.2 accessibility support
- HECVAT Lite & VPAT documentation

Key Capabilities

- Guided onboarding to get your network live quickly
- Ongoing platform support for your internal team

Growth Network

For multi-campus institutions and expanding digital ecosystems

Designed for institutions that need stronger governance, better visibility, and the ability to scale without adding internal complexity.

What this means for your team:

- Greater control over users, roles, and permissions
- Improved visibility into performance and usage
- Reduced reliance on internal developers and IT resources

Everything in Starter, plus:

- Advanced user roles and permissions
- Enhanced scalability for growing traffic and site volume
- Active performance monitoring
- Priority support response times
- Ongoing platform optimisation

Optional Add-ons

- Dedicated infrastructure for high-demand environments
- End-user support (faculty/staff support handled by CampusPress)

Enterprise Network

For large universities with complex governance, high traffic, and mission-critical digital infrastructure

A fully tailored solution designed to support large-scale institutions with advanced requirements and minimal tolerance for risk.

What this means for your team:

- Enterprise-grade reliability and performance
- Full governance across a complex web ecosystem
- A strategic partner—not just a hosting provider

Everything in Growth, plus:

- Dedicated cluster infrastructure (included)
- Support for complex multisite governance models
- End-user support included (reduces internal support burden)
- Strategic account management and ongoing consultation

Security, Compliance & Risk Reduction

CampusPress helps institutions reduce risk and meet compliance requirements without overloading internal teams:

- Proactive security monitoring and firewall protection
- Continuous updates across core, themes, and plugins
- Automated backups and disaster recovery
- CDN-enabled global performance
- Accessibility support aligned with WCAG 2.2
- HECVAT Lite and VPAT documentation
- Secure, SOC 2 Type II certified infrastructure

Outcome:

A compliant, secure web environment—without constant internal oversight.

Migration & Onboarding

We understand that migration is one of the biggest barriers to change.

CampusPress provides:

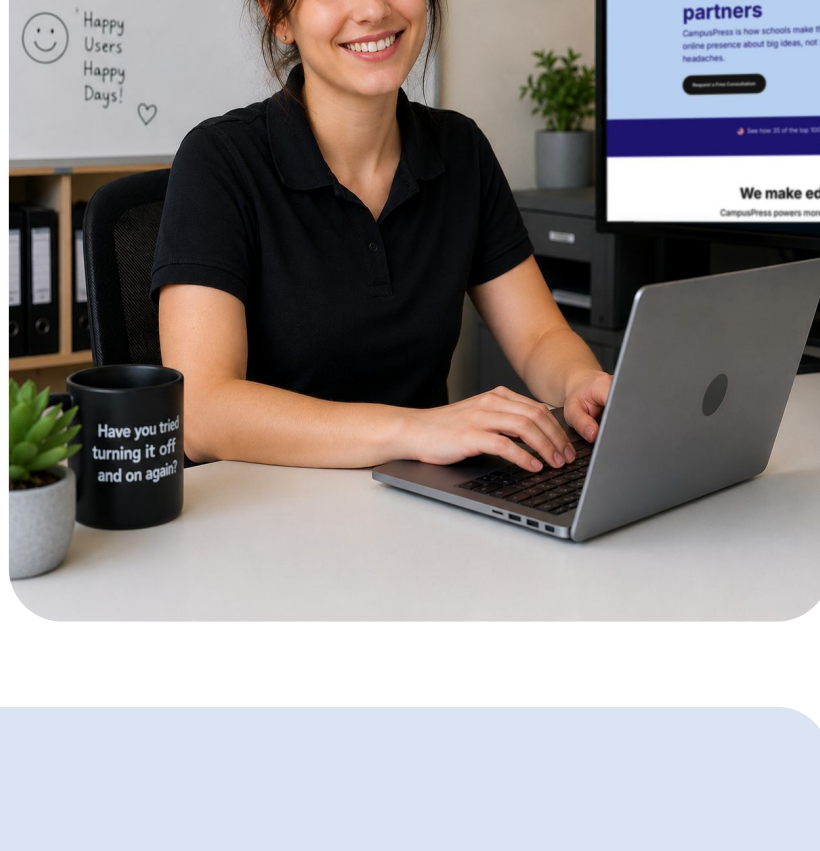

- Structured onboarding process
- Support for complex multisite migrations
- Minimal disruption to existing users and workflows
- Proven approach for large-scale institutional transitions

Support That Extends Your Team

CampusPress is more than a platform—we act as an extension of your team:

- Technical support for your web/IT teams
- Optional end-user support for faculty and staff
- Ongoing optimisation and strategic guidance
- Fast response times aligned to institutional needs

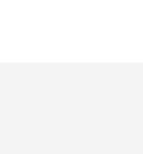

Outcome:

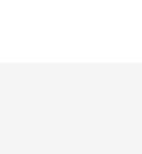

Your team spends less time troubleshooting and more time on strategic initiatives.

Flexible Add-Ons

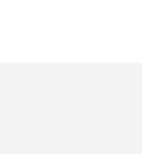

Available across all tiers:

Migration services (including complex multisite environments)

Custom development and integrations

Training for internal teams and stakeholders

The Result

With CampusPress, institutions gain:

- ✓ A single, governed platform for all web properties
- ✓ Reduced operational and security risk
- ✓ Consistent accessibility and compliance standards
- ✓ Faster site launches and easier management
- ✓ Significant time savings for internal teams
- ✓ A scalable foundation for future digital growth
